TOY CITY
TOY MANUFACTURER

TOYcity®

HISTORY

In 2012 in the area of games and toys our company named "Rah Shetab-e-Modern" was established. Our approach is designing and manufacturing good quality and useful products utilizing the most recent technologies available in the world. This company is branded "Toy City" and now is known to be one of the largest toy manufacturers in Iran. It is also the largest manufacturers of standard ocean balls nationwide.

This company now has different departments varying from R&D, production to marketing and sales.

Our approach is designing and manufacturing high quality and useful products utilizing the most recent technologies available in the world.

DEPARTEMENTS

Toycity now has different departments varying from R&D, production to marketing and sales.

RESEARCH AND DEVELOPMENT (R&D)

This department is responsible for conducting research on children's needs regarding toys. We also take the parents' concerns into thoughtful consideration. This must result in a product with eye-catching features- which are the main features sought by children- that satisfy their needs and ease their parents' concern. This unit is also responsible for checking the latest technologies in the world in order to help keeping the products up to the latest standards. One of our products which best fits to all the above-mentioned features is called "LegoMil" which is the new generation of Legos. Thanks to the researches by this department, the quality of products in areas such as appearance and hygiene (as the parents' main concerns) is ever-improving. The research results had three major outputs:

- 1) Using Nano technology in manufacturing products,
- 2) Producing antibacterial products,
- 3) Using edible colors.

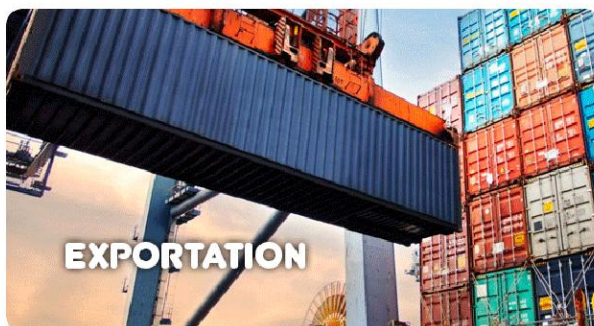

PRODUCTION DEPARTMENT

This unit is regarded as the core of the company which has the duty to execute the results obtained by R&D department in the production line. This section uses modern machineries and technologies in the world in different sections like production line, quality control, packaging and storage. This resulted in mechanizing the production process and eliminating the need for human intervention. This unit has supplied consumers with its high-quality products observing high and decent standards both in quality and hygiene.

MARKETING AND SALES DEPARTMENT

This section includes consulting team, national sales team and international sales team (export). Our consulting team provides practical advice about choosing proper toys and playground for amusement parks, kindergartens, and distribution centers.

EXPORT DEPARTMENT

Export team in the marketing and sales department started with exporting some of our products to our neighboring countries and later on, due to the high quality and variety of products, to other countries.

TOYCITY is a place where everyone works
with love for children and spreading
happiness in the world.

LET'S KEEP IN TOUCH

We are always in contact with our customers and we advance the production process to the post-production stages and we always seek the satisfaction of our customers.

SOFTPLAY PREVIEW

Special design for kindergartens

1

The first step is to submit a request for the design of the kindergarten play area and determine the size of the desired area. Then our experts will create an initial plan according to your needs, then you will apply your changes and receive the final plan.

2

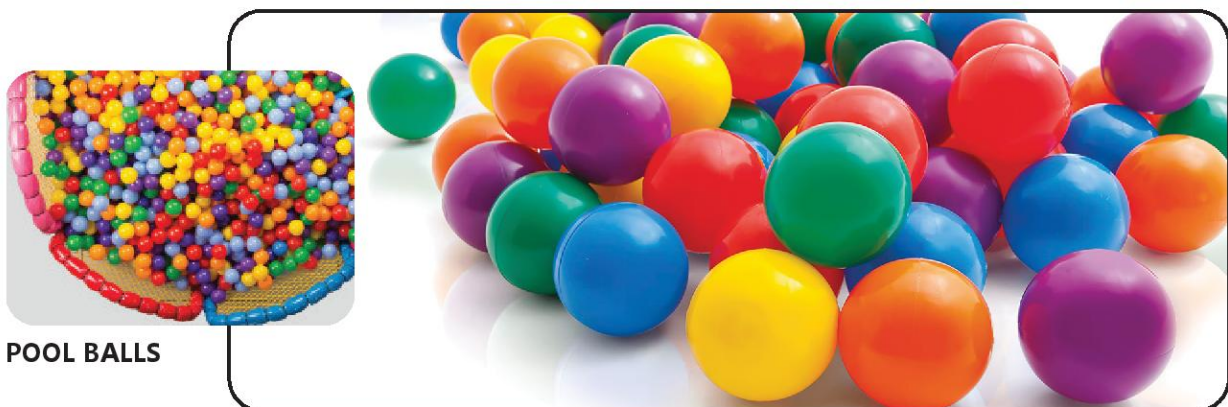

In the next step, our experts will come to your place for installation. Also, if you wish, we can teach you how to install.

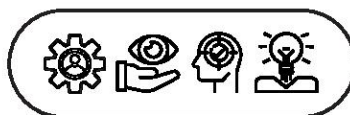

Games and toys are one of the critical needs of children. Nowadays with the advancement of technology and its usage in producing games; computer games with no movement, which have negative effects on mental and physical health of children, have superseded outdoor games. Most psychologists emphasize on children's playing more dynamic games such as ball games. These games provide an ideal atmosphere for children to sharpen their physical and mental skills.

Providing a suitable opportunity for the child to communicate, contact with other children, show emotions and even creating an environment to facilitate learning and understanding of shapes as well as enhancing the child's five senses, are among the merits of appropriate toys. Ocean ball pools are regarded as the most important and efficient motion games in amusement parks, kindergartens and even at home.

POOL BALLS

Toy City company has taken effective steps towards children's health by using nanotechnology in producing proper balls. We also, use antibacterial material and edible colors instead of toxic and harmful industrial ones, to add both charming appearance and making the surface safe for children and especially the very soft toddlers' skin. We guarantee our products to be hygiene and nonpolluting.

ANTIBACTERIAL

In addition to the above-mentioned features, using high quality materials, removing the sharp edges and thanks to the nanotechnology all of the features go hand in hand to produce a soft and firm product that can tolerate weights more than 130 kilograms.

Toy City company by observing all the criteria related to child's health and the balls' quality standards, managed to get national standard certificate
