Key Human Resources

The most vital component of ToyCity is its human resources—specialized and skilled professionals in the fields of design, production, and sales of toys. These experts are actively engaged in various departments, including:

- Head Office
- Research and Development
- Production and Manufacturing
- Domestic Sales
- International Sales

Research and Development

This unit is responsible for investigating children's needs regarding toys and examining the primary concerns of parents. Ultimately, the outcomes of this research aim to produce toys that not only captivate visually—which is the foremost attribute of a toy—but also meet children's needs while addressing parental concerns.

Additionally, this unit is tasked with exploring the latest global technologies to develop products with these essential features. Continuous improvement in product quality, particularly in areas such as visual appeal and health standards—one of the main concerns for parents—stems from the research conducted within this unit. Key outcomes include the incorporation of nanotechnology in production, the creation of antibacterial products, and the use of edible colors.

Production Unit

The Production Unit, as the core of our organization, is responsible for implementing the results of the Research and Development Unit's findings. Utilizing state-of-the-art machinery and technology, we have automated the production process, quality control, packaging, and warehousing to minimize human intervention. Our products are manufactured according to global standards, ensuring the highest hygiene and quality criteria for consumers.
